

# WICK BUSINESS PARK PHASE 2

## Feedback on public comments

Highlands and Islands Enterprise  
Iomairt na Gàidhealtachd's nan Eilean

Thank you for your comments so far. Here's what you've asked about with our answers and actions.

### You asked about the effect of any new buildings on the view from Ackergill houses to the northwest?

We'll add increased new planting to the plan on the perimeter of the site compared to the previous layout. This would help screen and soften the development in views from Ackergill. See our updated masterplan board.

### Also, what will be the effect of artificial light during construction and operation in views from Ackergill houses to the northwest?

Where artificial lighting is needed during construction and operation of the development, it will be non-intrusive and specifically designed and located to avoid or minimise any effect on local properties, including the operation of the airport, and other environmental considerations. These measures will be explained in the developer's 'construction environment management plan' and addressed during the detailed layout proposals.

### You wanted to know whether any development is taking place in the field between the development site and the Ackergill houses?

The field between the development site and Ackergill houses is outwith the development site and not part of the Phase 2 proposals.
